

UGC NET 2020 09th 17th Oct and 04th 05th 11th 12th 13th Nov 2020

Application No.	
Candidate Name	
Roll No.	
Test Date	05/11/2020
Test Time	3:00 PM - 6:00 PM
Subject	07 Anthropology

Section : PART I General Paper

Comprehension:

The following table shows the number of newspapers printed as shown inside the brackets and the number of newspapers distributed at different cities on a particular date. Answer the questions 1 to 5 :

City-wise Distribution of Newspaper				
Newspaper City	Newspaper A (2000)	Newspaper B (2000)	Newspaper C (1000)	Newspaper D (1000)
Delhi	1000	750	320	250
Lucknow	500	250	250	175
Varanasi	200	150	165	155
Jaipur	200	350	135	160

SubQuestion No : 1

Q.1

What is the ratio of distribution of Newspaper A to newspaper B?

- (1) 16 : 15
(3) 19 : 15

- (2) 7 : 5
(4) 17 : 15

Options 1. 1

2. 2
3. 3
4. 4

Question Type : MCQ

Question ID : 5362283316

Option 1 ID : 53622812913

Option 2 ID : 53622812914

Option 3 ID : 53622812915

Option 4 ID : 53622812916

Status : Answered

Chosen Option : 3

Comprehension:

The following table shows the number of newspapers printed as shown inside the brackets and the number of newspapers distributed at different cities on a particular date. Answer the questions 1 to 5 :

City-wise Distribution of Newspaper				
Newspaper City	Newspaper A (2000)	Newspaper B (2000)	Newspaper C (1000)	Newspaper D (1000)
Delhi	1000	750	320	250
Lucknow	500	250	250	175
Varanasi	200	150	165	155
Jaipur	200	350	135	160

SubQuestion No : 2

Q.2

In which city the distribution of paper is minimum?

- (1) Jaipur (2) Lucknow
(3) Delhi (4) Varanasi

Options 1. 1

2. 2

3. 3

4. 4

Question Type : MCQ

Question ID : 5362283313

Option 1 ID : 53622812901

Q.11 Match List I with List II : List II contains examples of the items Listed in List I.

List I

- (A) Web 2.0 Applications
- (B) Search Engines
- (C) System Softwares
- (D) High level languages

List II

- (I) Windows 8, i-OS
- (II) C++, Java
- (III) Blogs, Twitter
- (IV) Google, Yahoo

Choose the correct answer from the options given below :

- (1) (A)-(IV), (B)-(III), (C)-(I), (D)-(II)
- (2) (A)-(III), (B)-(IV), (C)-(I), (D)-(II)
- (3) (A)-(I), (B)-(III), (C)-(IV), (D)-(II)
- (4) (A)-(IV), (B)-(I), (C)-(III), (D)-(II)

Options 1. 1

2. 2

Comprehension:

Read the passage and answer questions 46 to 50.

'Power' has been differentiated by numerous authors and practitioners. Amitai Etzioni was among the first to describe individuals who are able to induce other individuals to comply and take action because of their position in the organization as having position power; those who derive their power from their followers are considered to have personal power. Some are skilled enough to have both. Position power is the extent to which those people to whom managers report are willing to delegate authority and responsibility to them. So position power tends to flow down in an organization. This is not to say that leaders do not have any impact on how much position power they accrue. They certainly do. The confidence and trust they develop with the people around them will often determine the willingness of upper management to delegate to them. Remember, though, that whatever power is delegated downward can also be taken back. Personal power is the extent to which followers respect, feel good about, and are committed to the leader. They believe that their own needs and goals will be recognized, supported, and facilitated by their leader. As such personal power in an organisational setting comes from below - from the followers - and so flows up in an organisation. Personal power is not inherent in the leader. If it were, managers with personal power could take over any department and have the same commitment and rapport they had in their last department. Personal power is a day-to-day phenomenon. Personal power is a critical part of having and demonstrating emotional intelligence.

SubQuestion No : 46

Q.46 The passage recognizes the critical role of

- (1) faith of the leader in his followers
- (2) emotional intelligence to have personal power
- (3) needs and goals of managers for personal power
- (4) power flowing upwards so that managers can gain personal power

Options 1. 1

2. 2

Q.5 Which of the following statements are true for the Australopithecus afarensis (Lucy)?

- (A) It was found from Hadar, Ethiopia
- (B) Their age is about 3.0-3.6 million years ago
- (C) Their cranial capacity was about 750cc
- (D) Foot prints indicate bipedal foot pattern

Choose the correct answer from the options given below :

- (1) (A), (B) and (C) only
- (2) (A), (B) and (D) only
- (3) (B), (C) and (D) only
- (4) (C) and (D) only

Options

- 1. 1
- 2. 2
- 3. 3
- 4. 4

Question Type : MCQ

Question ID : 5362283423

Option 1 ID : 53622813337

Option 2 ID : 53622813338

Q.8

Which of the following statements are true for mitochondrial DNA?

- (A) Human mitochondrial DNA codes for 37 genes
- (B) mt DNA is a double stranded loop of DNA
- (C) Each mitochondrion possesses between 100-200 mt DNA loops
- (D) mt DNA has only 16569 base pairs

Choose the most appropriate answer from the options given below :

- (1) (A) and (C) only
- (2) (A), (B) and (C) only
- (3) (C) and (D) only
- (4) (A), (B) and (D) only

Options 1. 1

- 2. 2
- 3. 3
- 4. 4

Q.34

Given below are two statements : One is labelled as Assertion A and the other is labelled as Reason R

Assertion (A) : Globalisation triggers worldwide changes, but different peoples and cultures are not necessarily changing in the same direction.

Reason (R) : Many of the cultures studied by Anthropologists in the last centuries have not changed inspite of powerful outside influences and internal dynamics.

In the light of the above statements, choose the correct answer from the options given below :

- (1) Both (A) and (R) are true and (R) is the correct explanation of (A)
- (2) Both (A) and (R) are true but (R) is not the correct explanation of (A)
- (3) (A) is true but (R) is false
- (4) (A) is false but (R) is true

Options

- 1. 1
- 2. 2
- 3. 3
- 4. 4

Comprehension:

Read the passage below and answer the questions that follow : (91 – 95)

In most societies in New Guinea, women did not traditionally participate in the resolution of disputes. And they could not bring actions against men. But when village courts were introduced, women began to go to court to redress offenses against them.

In colonial times, the introduced western-style courts followed Western law, primarily Australian and British common law, not native customary law. After Papua New Guinea became an independent country, those courts remained in place. The lowest of the courts, called local courts, were located in town centers, often far from villages. In 1973, a new kind of court was created, called village courts, they were designed to settle local disputes in the villages, using a blend of customary law and western law. In contrast to local courts, magistrates in the village courts were selected from the pool of traditional and local leaders.

When Richard Scaglion studied changes in village courts from 1977 to 1987, he noticed a shift towards an increased use of these courts by women. A joint study by Scaglion and Rose Whittingham revealed that when women approach the courts, the cases are mostly related to sex – related offenses (sexual jealousy, rape, incest, domestic disputes) committed by men. Most disputes in New Guinea villages are settled informally by self – help or by appeal to a "big man"; the courts are appealed to as a last resort. Women do not believe that they can get satisfaction informally. So they go to the village court, where they win some sort of punishment for the defendant in about 60 percent of the cases, just about the same rate that men achieve when they bring a case seeking punishment.

SubQuestion No : 91

Q.91 Women in New Guinea traditionally avoided participating in dispute resolution because :

- (1) They belonged to a male – dominated society
- (2) They belonged to an egalitarian simple society
- (3) They did not believe they will get satisfaction in informal settlements
- (4) They feared social stigma attached to it

In contrast to local courts, magistrates in the village courts were selected from the pool of traditional and local leaders.

When Richard Scaglion studied changes in village courts from 1977 to 1987, he noticed a shift towards an increased use of these courts by women. A joint study by Scaglion and Rose Whittingham revealed that when women approach the courts, the cases are mostly related to sex – related offenses (sexual jealousy, rape, incest, domestic disputes) committed by men. Most disputes in New Guinea villages are settled informally by self – help or by appeal to a "big man"; the courts are appealed to as a last resort. Women do not believe that they can get satisfaction informally. So they go to the village court, where they win some sort of punishment for the defendant in about 60 percent of the cases, just about the same rate that men achieve when they bring a case seeking punishment.

SubQuestion No : 92

Q.92

What did Scaglion find in his study?

- (1) Increased use of courts by women
- (2) More appeals by women but less resolution
- (3) Women prefer self – help redressals
- (4) Decreased cases of domestic disputes

Options 1. 1

2. 2

3. 3

Option 3 ID : 53622813471

Option 4 ID : 53622813472

Status : Answered

Chosen Option : 1

Comprehension:

Read the passage below and answer the questions that follow : (91 – 95)

In most societies in New Guinea, women did not traditionally participate in the resolution of disputes. And they could not bring actions against men. But when village courts were introduced, women began to go to court to redress offenses against them.

In colonial times, the introduced western-style courts followed Western law, primarily Australian and British common law, not native customary law. After Papua New Guinea became an independent country, those courts remained in place. The lowest of the courts, called local courts, were located in town centers, often far from villages. In 1973, a new kind of court was created, called village courts, they were designed to settle local disputes in the villages, using a blend of customary law and western law. In contrast to local courts, magistrates in the village courts were selected from the pool of traditional and local leaders.

When Richard Scaglion studied changes in village courts from 1977 to 1987, he noticed a shift towards an increased use of these courts by women. Comprehension:

Read the passage below and answer the questions that follow : (96 – 100)

Since the Neolithic, people have had to cope up with a host of new diseases that began as a consequence of changes in human behaviour. Over the past several decades, this has become a renewed source of concern following the resurgence of infectious diseases and the spread of a host of new and lethal diseases. More than thirty diseases, new to medicine have emerged in the past thirty – five years. Perhaps the best known of these is AIDS, which has become a top killer among infectious diseases. But there are others - like Ebola hemorrhagic fever, which causes victims to bleed to death, and other hemorrhagic fevers like dengue fever, Lassa fever and hantavirus. Although it is not clear what has sparked the appearance and spread of these new diseases, one theory is that some are the result of human activities. In particular, road construction and the intrusion of people into remote ecological settings, such as rainforests, along with worldwide shipping and airplane traffic, allow viruses and other infectious microbes to spread rapidly to large numbers of people.

Most of the "new" viruses that have suddenly, afflicted humans are in fact old ones present in animals - such as monkeys (monkey pox), rodents (hanta virus), deer (Lyme disease) and insects (West Nile virus). What is different is that something has enabled them to jump from their animal hosts to humans. Large – scale habitat disturbance is an obvious explanation for such disease transfers. In a globalized world, as travel allows diseases to spread worldwide, we need a fuller understanding of how pathogens interact with their hosts if we are to devise effective preventive and therapeutic strategies to deal with them.

SubQuestion No : 96**Q.96**

What is the obvious reason for the emergence of new diseases?

- | | |
|----------------------------------|------------------------------|
| (1) Reinsurgence of old diseases | (2) domestication of animals |
| (3) Changes in human behaviour | (4) increased mobility |
