| 13 | Assertion: Primary endosperm nucleus is diploid.<br>Reason: It is the product of double fertilisation.                                                                                                                                              | 1 |
| 14 | Assertion: Ribosomal RNA is synthesized in the nucleus of the cell.<br>Reason: It is translated with the enzyme RNA polymerase III.                                                                                                                 | 1 |
| 15 | Assertion: Smoking can raise blood pressure and increase heart rate.<br>Reason: Nicotine stimulates adrenal glands to release adrenaline and nor-adrenaline into the blood circulation, both of which raise blood pressure and increase heart rate. | 1 |
| 16 | Assertion: PCR is a powerful technique to identify genetic disorders.<br>Reason: PCR can detect mutations in low amounts of DNA.                                                                                                                    | 1 |

Biomass of a standing crop of phytoplankton is  $4 \text{ kg/m}^2$  which supports a large standing crop of zooplankton having a biomass  $11 \text{ kg/m}^2$ . This is consumed by small fishes having biomass  $25 \text{ kg/m}^2$  which are then consumed by large fishes with the biomass  $37 \text{ kg/m}^2$ .

Draw an ecological pyramid indicating the biomass at each stage and also name the trophic levels. Mention whether it is an upright or inverted pyramid.

Observe the graph given below.

The graph represents inter-specific interaction between two species of *Paramecia* competing for the same resource in a culture medium. *Paramecium caudatum* and *Paramecium aurelia* were grown in separate cultures as well as in mixed cultures. It was found that each species grew in numbers according to the logistic equation.

- Which species is competitively superior? Support it with the data provided in the graph.
- State the underlying principle for the above result and name the scientist associated with this principle.
- Explain the mechanism in which two or more species competing with each other can co - exist.
