ik with suitable tense.
in buying the product

Read the short passage below and answer the questions that follow.

The United Nations is an international organisation that was established in 1945 to help keep the world at peace. It was established shortly after the end of World War II. In 1948 a special United Nations mission, headed by Mrs. Eleanor Roosevelt, the wife of US President Franklin D. Roosevelt, wrote a special document which stated the rights that all people should have. This document is called the "Universal Declaration of Human Rights." "Universal" means "of all the world." A "declaration" is a formal announcement. "Human rights" are the rights that all people have, simply because he or she is human. The human rights are there to protect us and to help us live in peace. For example, "the right to life" is a human right. Each and every one of us has the right to life, simply because we are humans. Another example is "the right to freedom of religion." All people have the right to believe in what we want to believe, to have a religion, or to not have a religion. Studying and knowing our human rights is as important today as it was after World War II. This is because when people don't know their natural rights things such as injustice, discrimination, intolerance and slavery can happen. The more aware people are to the United Nations Universal Declaration of Human Rights, the closer we get to a peaceful, free and fair world.
