	Comprehension:
	Read the given passage and answer the questions that follow. From the world of magic, hypnosis is moving into the world of medicine, from hocus-pocus performed by men in black capes to hypnotherapy practised by doctors in white coats. The purpose is to help people stop smoking, lose weight, overcome phobias and control pain in a variety of medical situations, from childbirth to cancer. Research laboratories are currently checking out the success rate of therapy under hypnosis, while medical journals stand by to publish the results. And the important thing is, nobody is laughing. In the 1840's, a British doctor in Calcutta created a controversy by performing over 1000 operations with hypnosis as the only anaesthesia. During the World Wars, German and British doctors used hypnosis to treat war neuroses. Hypnosis, thus, is a therapeutic technique that induces a focused, trance-like state to enhance concentration. It's used to treat anxiety, pain, addictions and phobias by accessing the subconscious mind for behavioral change.
	SubQuestion No : 58
Q.5 8	How did the German and British doctors use hypnosis?
Ans	✗ 1. It was fashionable during the war period.
	✗ 2. It was used to make people laugh during stress.
	✗ 3. It was used to perform magic tricks.
	✓ 4. It was used as a substitute for anaesthesia.
