	Comprehension:
	Read the given passage and answer the questions that follow. Embalming was an important practice in ancient Egypt, closely connected to religious beliefs about the afterlife. Egyptians believed that preserving the body was necessary for the soul to continue its existence beyond death. Skilled embalmers developed careful techniques to prevent the body from decaying. The process involved removing internal organs, drying the body with natural salts, and wrapping it with layers of linen cloth. Special oils and resins were applied to protect the body and preserve its appearance. This procedure could take several weeks to complete and required trained specialists. Wealthy families often paid large amounts of money for elaborate embalming methods, while simpler versions were used for ordinary people. The preserved body, known as a mummy, was placed inside decorated coffins and buried with objects believed to be useful in the afterlife. Through archaeological discoveries, historians have gained valuable knowledge about ancient Egyptian culture, medicine, and religious traditions.
	SubQuestion No : 61
Q.61	Select the option that best represents an appropriate title for the passage.
