

SBI Apprentice Sample Paper 02

Q1. Which of the following word best fits in blank (A)?

In the following passage there are blanks, each of which has been denoted by a letter. For each blank, five options are given. Choose the most appropriate word from the options that fits the blank appropriately.

Health authorities have launched a nationwide campaign to _____ (A) the spread of a newly identified infectious disease. Hospitals in affected regions are experiencing a sharp _____ (B) in patient admissions, straining available medical resources. The government has _____ (C) additional funds to procure vaccines and essential medicines. Citizens are urged to maintain _____ (D) hygiene practices such as regular handwashing and wearing masks in crowded places. Experts warn that ignoring safety _____ (E) could lead to a rapid escalation of cases.

- (a) contain
- (b) contamin
- (c) ignore
- (d) aggravate
- (e) postpone

Ans.(a)

Q2. Which of

In the followi _____ which has _____, five options
are given. Cho _____ the option

Health autho _____ campaign to _____ ly identified
infectious dis _____ are ex _____ t admissions,
straining ava _____ ernm _____ cure vaccines
and essentia _____ to maintain _____ h as regular
handwashing _____ places. Experts warn t _____ (E) could lead
to a rapid esc _____

- (a) decline
- (b) collapse
- (c) surge
- (d) shortage
- (e) improvem

Ans.(c)

Q3. Which of

In the followi _____, five options
are given. Cho _____

Health authorities have launched a nationwide campaign to _____ (A) the spread of a newly identified infectious disease. Hospitals in affected regions are experiencing a sharp _____ (B) in patient admissions, straining available medical resources. The government has _____ (C) additional funds to procure vaccines and essential medicines. Citizens are urged to maintain _____ (D) hygiene practices such as regular handwashing and wearing masks in crowded places. Experts warn that ignoring safety _____ (E) could lead to a rapid escalation of cases.

- (a) withdrawn
- (b) borrowed
- (c) wasted
- (d) rejected
- (e) allocated

Ans.(e)

Q4. Which of the following word best fits in blank (D)?

In the following passage there are blanks, each of which has been denoted by a letter. For each blank, five options are given. Choose the most appropriate word from the options that fits the blank appropriately.

Health authorities have launched a nationwide campaign to _____ (A) the spread of a newly identified infectious disease. Hospitals in affected regions are experiencing a sharp _____ (B) in patient admissions, straining available medical resources. The government has _____ (C) additional funds to procure vaccines and essential medicines. Citizens are urged to maintain _____ (D) hygiene practices such as regular handwashing and wearing masks in crowded places. Experts warn that ignoring safety _____ (E) could lead to a rapid escalation of cases.

- (a) improper
- (b) proper
- (c) occasional
- (d) careless
- (e) minimal

Ans.(b)

Q5. Which of

In the following passage there are blanks, each of which has been denoted by a letter. For each blank, five options are given. Choose the most appropriate word from the options that fits the blank appropriately.

Health authorities have launched a nationwide campaign to _____ (A) the spread of a newly identified infectious disease. Hospitals in affected regions are experiencing a sharp _____ (B) in patient admissions, straining available medical resources. The government has _____ (C) additional funds to procure vaccines and essential medicines. Citizens are urged to maintain _____ (D) hygiene practices such as regular handwashing and wearing masks in crowded places. Experts warn that ignoring safety _____ (E) could lead to a rapid escalation of cases.

- (a) obstacles
- (b) policy
- (c) rumours
- (d) guidelines
- (e) festivities

Ans.(d)

Q6. (A) exper

- (B) the heart
- (C) agri-tourism
- (D) visit to a

Each of the following questions give a sentence which has been divided into four parts which might not be in their correct order of narrative. The sentence is then followed by five options, one of which gives the sequence of the rearranged parts to make the sentence meaningful. You must choose the option which gives the correct sequence of the parts. If the sentence is already arranged in the correct sequence or the correct sequence doesn't match with any of the given sequence, mark option " No rearrangement required " as your answer.

- (a) CBAD
- (b) BCDA
- (c) BADC
- (d) CDAB
- (e) No rearrangement required

Ans.(d)

Q7. (A) sanctuaries across cultures and

- (B) temples, revered as sacred
- (C) shaping the very essence of communities
- (D) civilizations, hold a profound influence in

Each of the following questions give a sentence which has been divided into four parts which might not be in their correct order of narrative. The sentence is then followed by five options, one of which gives the sequence of the rearranged parts to make the sentence meaningful. You must choose the option which gives the correct sequence of the parts. If the sentence is already arranged in the correct sequence or the correct sequence doesn't match with any of the given sequence, mark option " No rearrangement required " as your answer.

- (a) BACD
- (b) ABDC
- (c) ADBC
- (d) BADC
- (e) No rearrangement required

Ans.(d)

- Q8.** (A) Stein
(B) becomes
(C) a co-creat
(D) spiritual

Each of the following questions give a sentence which has been divided into four parts which might not be in their correct order of narrative. The sentence is then followed by five options, one of which gives the sequence of the rearranged parts to make the sentence meaningful. You must choose the option which gives the correct sequence of the parts. If the sentence is already arranged in the correct sequence or the correct sequence doesn't match with any of the given sequence, mark option " No rearrangement required " as your answer.

- (a) ACBD
- (b) DBCA
- (c) CBDA
- (d) ADBC
- (e) No rearrangement required

Ans.(d)

- Q9.** (A) integrate their agricultural practices
(B) public welfare regarding the
(C) opening the
(D) farmers' movement

Each of the following questions give a sentence which has been divided into four parts which might not be in their correct order of narrative. The sentence is then followed by five options, one of which gives the sequence of the rearranged parts to make the sentence meaningful. You must choose the option which gives the correct sequence of the parts. If the sentence is already arranged in the correct sequence or the correct sequence doesn't match with any of the given sequence, mark option " No rearrangement required " as your answer.

- (a) DBAC
- (b) DCAB
- (c) DCBA
- (d) DACB
- (e) No rearrangement required

Ans.(c)

- Q10.** (A) infusing its own innovations
(B) as the Roman Empire
(C) adapted Greek architectural styles while

(D) expanded, it adopted and

Each of the following questions give a sentence which has been divided into four parts which might not be in their correct order of narrative. The sentence is then followed by five options, one of which gives the sequence of the rearranged parts to make the sentence meaningful. You must choose the option which gives the correct sequence of the parts. If the sentence is already arranged in the correct sequence or the correct sequence doesn't match with any of the given sequence, mark option " No rearrangement required " as your answer.

- (a) ACBD
- (b) CBAD
- (c) BDCA
- (d) DCBA
- (e) No rearrangement required

Ans.(c)

Q11. The Ken and Betw... address(D) the
Ken and Betw...
In the question... have been placed
in their corre... of words that
should replac... and the correct
combination...

- (a) A-B
- (b) B-D
- (c) C-D
- (d) A-C
- (e) No interchange required

Ans.(b)

Q12. Two... fires(A) n... Los... forced
70,000 destr...
In the question... These four words are may not have been placed
in their corre... options with the correct combination of words that
should replac... grammatically and contextually correct and the correct
combination... words that should replace each other

- (a) A-B
- (b) B-C
- (c) C-D
- (d) A-C
- (e) No interchange required

Ans.(b)

Q13. Sheikh Hasina's fall in Bangladesh has curb(A) concerns over fencing(B) West Bengal's 2,216-km porous(C) border to reignited(D) smuggling.

In the question given below, four words have been highlighted. These four words are may not have been placed in their correct positions. The sentence is then followed by options with the correct combination of words that should replace each other in order to make the sentence grammatically and contextually correct. Find the correct combination of the words that should replace each other.

- (a) A-D
- (b) B-C
- (c) C-D
- (d) A-C
- (e) No interchange required

Ans.(a)

Q14. Renowned playback(A) singer P. Jayachandran battling(B) away at 81 in Thrissur, passed(C) cancer, after a six-decade-long illustrious(D) career.

In the question given below, four words have been highlighted. These four words are may not have been placed in their correct positions. The sentence is then followed by options with the correct combination of words that should replace each other in order to make the sentence grammatically and contextually correct. Find the correct combination of the words that should replace each other.

- (a) A-B
- (b) B-C
- (c) C-D
- (d) A-C
- (e) No interchange required

Ans.(b)

Q15. Niti Aashrafi, a well-known Indian journalist and author, has been appointed as the Vice Chairman of the National Commission on Women.

In the question given below, four words have been placed in the sentence. These four words are may not have been placed in their correct positions. The sentence is then followed by options with the correct combination of words that should replace each other in order to make the sentence grammatically and contextually correct. Find the correct combination of the words that should replace each other.

- (a) A-B
- (b) B-C
- (c) C-D
- (d) A-C
- (e) No interchange required

Ans.(c)

Q16. How do we know if there are other universes? The multiverse hypothesis suggests that our universe is not the only one but rather one of many universes that exist. This idea has been popularized by physicists and philosophers for decades, but it remains a controversial topic. The possibility that our universe is just a small part of a much larger and more complex multiverse has gained significant support in cosmology and physics in recent years.

One of the primary reasons for the popularity of the multiverse hypothesis is the success of the theory of cosmic inflation. This theory suggests that the universe underwent a period of rapid expansion in the first fraction of a second after the Big Bang. This expansion could have created many "pocket" universes, each with its own distinct physical laws and constants. Observations of the cosmic microwave background radiation, the afterglow of the Big Bang, reveal minute temperature fluctuations that some scientists argue are indicative of interactions with other universes.

Additionally, string theory, which attempts to reconcile general relativity and quantum mechanics, naturally leads to a multiverse scenario. String theory posits the existence of multiple dimensions beyond the familiar three spatial dimensions and time. These extra dimensions could give rise to numerous universes with different properties. While string theory remains unproven, its mathematical framework supports the multiverse concept. However, the multiverse hypothesis faces significant challenges. One of the most pressing issues is the lack of direct observational evidence. By definition, other universes are beyond the observable horizon of our own, making it incredibly difficult to gather empirical data. Critics argue that without direct evidence, the multiverse theory remains speculative and borders on metaphysics rather than science.

Philosophically, the multiverse hypothesis raises profound questions about the nature of reality and our place within it. If multiple universes exist, each potentially with its own version of "us," it challenges our understanding of the self and the universe.

of individuality and existence. Moreover, it complicates the concept of fine-tuning, the idea that certain conditions in our universe are precisely set to allow for life. If countless other universes exist, some with the right conditions for life and others without, the fine-tuning argument might lose its significance.

In conclusion, recent cosmological and theoretical physics findings support the multiverse hypothesis, but _____ and philosophical debates persist. The quest to understand the multiverse continues to challenge and expand the boundaries of science and philosophy.

- (a) By offering an analytical framework that naturally includes multiple dimensions, leading to various possible universes.
- (b) By providing a detailed mathematical analysis for proving theories about other universes within the black hole.
- (c) By suggesting that quantum fluctuations can create various parallel universes in a laboratory setting.
- (d) By reconciling discrepancies between Newtonian mechanics and modern physics, thus allowing for multiple universes.
- (e) By providing evidence for the existence of other universes.

Ans.(a)

Q17. Which of the following best describes the main purpose of the passage?

Read the given passage and answer the question.

The multiverse hypothesis, also known as the many-worlds interpretation, suggests that there are not just one but an infinite number of universes that exist. This idea has gained significant popularity in the scientific community, particularly in the field of cosmology. This idea has been supported by various theories and observations. One of the most prominent theories is the inflationary multiverse, which suggests that the universe underwent a period of rapid expansion following the Big Bang, creating numerous "pocket" universes, each with its own set of physical constants. Observations of the cosmic microwave background radiation, the afterglow of the Big Bang, have provided some support to the multiverse hypothesis. Additionally, the theory of quantum mechanics, which describes the behavior of particles at the smallest scales, naturally leads to a multiverse interpretation. Some scientists argue that the existence of multiple dimensions beyond the familiar three spatial dimensions could give rise to numerous universes with different properties. While the multiverse hypothesis is appealing, its mathematical framework is still under development. However, the multiverse hypothesis faces significant challenges. One of the most prominent is the lack of direct observational evidence for other universes, making it difficult to test the theory. The multiverse theory remains a speculative concept, and our place within it, if multiple universes exist, each potentially with its own version of "us," challenges our understanding of individuality and existence. Moreover, it complicates the concept of fine-tuning, the idea that certain conditions in our universe are precisely set to allow for life. If countless other universes exist, some with the right conditions for life and others without, the fine-tuning argument might lose its significance.

In conclusion, recent cosmological and theoretical physics findings support the multiverse hypothesis, but _____ and philosophical debates persist. The quest to understand the multiverse continues to challenge and expand the boundaries of science and philosophy.

- (a) Regions within our universe that have experienced different rates of cosmic expansion, resulting in varied physical laws.
- (b) Isolated areas within the observable universe where cosmic microwave background radiation is absent, following Big Bang.
- (c) Separate universes formed due to rapid expansion post-Big Bang, each with unique physical constants.
- (d) Theoretical constructs that exist within the singularity of black holes, exhibiting distinct physical properties.

(e) Regions within our universe where the effects of the Big Bang are still observable today as Steady State universe.

Ans.(c)

Q18. What philosophical questions does the multiverse hypothesis raise about the nature of reality?

Read the given passage and answer the following questions.

The multiverse hypothesis posits that our universe is not the only one but rather one of many universes that exist. This idea has captivated both physicists and philosophers for decades, offering a tantalizing glimpse into the possibility that our universe is just a small part of a much larger and more complex reality. Recent advancements in cosmology and theoretical physics have provided some intriguing evidence that lends support to the multiverse theory, although it remains highly controversial.

One of the primary pieces of evidence comes from the study of cosmic inflation. The theory of cosmic inflation suggests that the rapid expansion of the universe following the Big Bang could have created "pocket" universes, each with its own distinct physical laws and constants. Observations of the cosmic microwave background radiation, the afterglow of the Big Bang, have revealed subtle patterns that some scientists argue are indicative of multiple universes.

Additionally, the concept of a multiverse naturally leads to a multiverse of possibilities. Just as our universe has a familiar three-dimensional spatial structure, other universes could have different spatial dimensions or even different physical laws. This idea challenges our understanding of reality and our place within it.

However, the multiverse hypothesis also presents significant challenges. One of the most prominent is the lack of direct observational evidence for other universes. Without the ability to observe or interact with other universes, the theory remains largely speculative. Moreover, the concept of a multiverse raises profound philosophical questions about the nature of reality and our place within it.

Philosophical questions arise from the multiverse hypothesis, such as whether there is a single, unified reality or if each universe is a separate, self-contained entity. These questions challenge our understanding of the universe and our place within it.

Philosophical questions arise from the multiverse hypothesis, such as whether there is a single, unified reality or if each universe is a separate, self-contained entity. These questions challenge our understanding of the universe and our place within it. The multiverse hypothesis complicates the concept of a single, unified reality and raises questions about the nature of existence and the possibility of other universes.

In conclusion, the multiverse hypothesis is a fascinating and controversial idea that challenges our understanding of the universe and our place within it. While recent advancements in cosmology and theoretical physics have provided some intriguing evidence that lends support to the multiverse theory, the hypothesis remains highly speculative and controversial. The concept of a multiverse raises profound philosophical questions about the nature of reality and our place within it, and it challenges our understanding of the universe and our place within it.

(a) Whether our universe is the only one with observable physical laws and constants.

(b) How many universes there are.

(c) Why our universe exists.

(d) If the existence of other universes challenges our understanding of reality.

(e) Whether the multiverse hypothesis is a valid scientific theory.

Ans.(d)

Q19. How does the multiverse hypothesis challenge traditional views of reality?

Read the given passage and answer the following questions.

The multiverse hypothesis posits that our universe is not the only one but rather one of many universes that exist. This idea has captivated both physicists and philosophers for decades, offering a tantalizing glimpse into the possibility that our universe is just a small part of a much larger and more complex reality. Recent advancements in cosmology and theoretical physics have provided some intriguing evidence that lends support to the multiverse theory, although it remains highly controversial.

One of the primary pieces of evidence comes from the study of cosmic inflation. The theory of cosmic inflation suggests that the rapid expansion of the universe following the Big Bang could have created "pocket" universes, each with its own distinct physical laws and constants. Observations of the cosmic microwave background

radiation, the afterglow of the Big Bang, reveal minute temperature fluctuations that some scientists argue are indicative of interactions with other universes.

Additionally, string theory, which attempts to reconcile general relativity and quantum mechanics, naturally leads to a multiverse scenario. String theory posits the existence of multiple dimensions beyond the familiar three spatial dimensions and time. These extra dimensions could give rise to numerous universes with different properties. While string theory remains unproven, its mathematical framework supports the multiverse concept. However, the multiverse hypothesis faces significant challenges. One of the most pressing issues is the lack of direct observational evidence. By definition, other universes are beyond the observable horizon of our own, making it incredibly difficult to gather empirical data. Critics argue that without direct evidence, the multiverse theory remains speculative and borders on metaphysics rather than science.

Philosophically, the multiverse hypothesis raises profound questions about the nature of reality and our place within it. If multiple universes exist, each potentially with its own version of "us," it challenges our understanding of individuality and existence. Moreover, it complicates the concept of fine-tuning, the idea that certain conditions in our universe are precisely set to allow for life. If countless other universes exist, some with the right conditions for life and others without, the fine-tuning argument might lose its significance.

In conclusion, the multiverse hypothesis is a fascinating concept that challenges our understanding of reality, but it also faces significant challenges and remains a topic of ongoing debate.

_____ and _____ are two of the most prominent theories that attempt to explain the existence of multiple universes.

- (a) By suggesting that the universe is a simulation.
- (b) By proposing that the universe is a vast, empty space.
- (c) By asserting that the universe is a complex, interconnected network of multiple universes.
- (d) By proposing that the universe is a vast, empty space.
- (e) None of the above.

Ans.(d)

Q20. What is the main reason why the multiverse hypothesis is considered speculative?

Read the given passage and answer the following question.

The multiverse hypothesis is a concept that suggests the existence of multiple universes.

This idea has gained popularity in recent years, particularly among scientists who study the universe.

possibility that there are other universes out there, each with its own set of physical laws and constants.

Advancements in cosmology and theoretical physics have provided some intriguing evidence that supports the

multiverse theory, though it remains highly controversial.

One of the primary pieces of evidence comes from the study of cosmic inflation. The theory of

suggests that the universe underwent a rapid expansion in the first fraction of a second after the Big Bang.

each with its own set of physical laws and constants.

radiation, the afterglow of the Big Bang, reveal minute temperature fluctuations that some scientists argue are

indicative of interactions with other universes.

Additionally, string theory, which attempts to reconcile general relativity and quantum mechanics, naturally leads

to a multiverse scenario. String theory posits the existence of multiple dimensions beyond the familiar three

spatial dimensions and time. These extra dimensions could give rise to numerous universes with different

properties. While string theory remains unproven, its mathematical framework supports the multiverse concept.

However, the multiverse hypothesis faces significant challenges. One of the most pressing issues is the lack of

direct observational evidence. By definition, other universes are beyond the observable horizon of our own,

making it incredibly difficult to gather empirical data. Critics argue that without direct evidence, the multiverse

theory remains speculative and borders on metaphysics rather than science.

Philosophically, the multiverse hypothesis raises profound questions about the nature of reality and our place

within it. If multiple universes exist, each potentially with its own version of "us," it challenges our understanding

of individuality and existence. Moreover, it complicates the concept of fine-tuning, the idea that certain conditions

in our universe are precisely set to allow for life. If countless other universes exist, some with the right conditions

for life and others without, the fine-tuning argument might lose its significance.

In conclusion, recent cosmological and theoretical physics findings support the multiverse hypothesis, but _____ and philosophical debates persist. The quest to understand the multiverse continues to challenge and expand the boundaries of science and philosophy.

- (a) The cosmic microwave background radiation is the key to understanding the Big Bang.
- (b) The multiverse hypothesis offers a revolutionary but controversial perspective on the nature of reality.
- (c) The controversial String theory provides definitive proof of the existence of multiple universes.
- (d) Critics have universally dismissed the multiverse hypothesis due to lack of evidence.
- (e) Philosophical debates about the nature of individuality have no bearing on scientific theories.

Ans.(b)

Q21. Which of the following is the synonym of the word “tantalizing” highlighted in the passage?

Read the given passage and answer the following questions.

The multiverse hypothesis posits that our universe is not the only one but rather one of many universes that exist. This idea has captivated both physicists and philosophers for decades, offering a tantalizing glimpse into the possibility that our universe is just a small part of a much larger and more complex reality. Recent advancements in cosmology and theoretical physics have provided some support to the multiverse theory. One of the primary pieces of evidence cited in favor of the multiverse is the theory of cosmic inflation. This theory suggests that immediately after the Big Bang, the universe underwent a period of extremely rapid expansion. This expansion could have created multiple “pocket” universes, each with its own physical laws and constants. The cosmic microwave background radiation, the afterglow of the Big Bang, shows minute temperature fluctuations that some scientists argue are indicative of the boundaries between these universes. Additionally, the theory of string theory, which attempts to reconcile general relativity with quantum mechanics, naturally leads to a multiverse. String theory posits that the fundamental building blocks of the universe are one-dimensional “strings” rather than the familiar three-dimensional objects. These strings can vibrate in different ways, creating different physical laws. If multiple universes exist with different properties, it would explain why our universe is the way it is. However, the multiverse hypothesis also faces significant challenges. One of the most prominent is the lack of direct observational evidence. If other universes exist, they are likely far beyond our ability to observe, making it incredibly difficult to test the hypothesis. Some scientists argue that without direct evidence, the multiverse theory remains more of a philosophical speculation than a scientific theory. Philosophical debates about the nature of reality and our place within it are also raised by the multiverse hypothesis. If multiple universes exist, what does it mean for individuality and existence? Moreover, it complicates the current of finding the ideal conditions for life and other phenomena in our universe. In conclusion, while recent scientific findings support the multiverse hypothesis, but _____ and philosophical debates persist. The quest to understand the multiverse continues to challenge and expand the boundaries of science and philosophy.

- (a) profuse
- (b) scrimping
- (c) appalling
- (d) deplorable
- (e) enticing

Ans.(e)

Q22. What is implied about our understanding of individuality if multiple universes exist?

Read the given passage and answer the following questions.

The multiverse hypothesis posits that our universe is not the only one but rather one of many universes that exist. This idea has captivated both physicists and philosophers for decades, offering a tantalizing glimpse into the possibility that our universe is just a small part of a much larger and more complex reality. Recent advancements

in cosmology and theoretical physics have provided some intriguing evidence that lends support to the multiverse theory, although it remains highly controversial.

One of the primary pieces of evidence comes from the study of cosmic inflation. The theory of cosmic inflation suggests that the rapid expansion of the universe following the Big Bang could have created "pocket" universes, each with its own distinct physical laws and constants. Observations of the cosmic microwave background radiation, the afterglow of the Big Bang, reveal minute temperature fluctuations that some scientists argue are indicative of interactions with other universes.

Additionally, string theory, which attempts to reconcile general relativity and quantum mechanics, naturally leads to a multiverse scenario. String theory posits the existence of multiple dimensions beyond the familiar three spatial dimensions and time. These extra dimensions could give rise to numerous universes with different properties. While string theory remains unproven, its mathematical framework supports the multiverse concept. However, the multiverse hypothesis faces significant challenges. One of the most pressing issues is the lack of direct observational evidence. By definition, other universes are beyond the observable horizon of our own, making it incredibly difficult to gather empirical data.

Critics argue that without direct evidence, the multiverse theory remains speculative and borders on metaphysics rather than science. Philosophical questions also arise regarding our place within it. If multiple universes exist, what does that mean for the uniqueness of our own universe? The concept of individuality and the possibility of other versions of ourselves in other universes challenge our understanding of life and existence. In conclusion, while the multiverse hypothesis is an intriguing idea, it remains a topic of ongoing debate and scientific inquiry.

- _____ and _____ request to understand the multiverse challenge and expand the boundaries of our knowledge.
- (a) Individual universes have different physical laws across the multiverse.
 - (b) Individual universes operate independently of each other with no interactions.
 - (c) Individual universes are different versions of individual universes.
 - (d) Both (a) & (b)
 - (e) Individual universes are not real.

Ans.(c)

Q23. Which of the following is the antonym of the word "reconcile" highlighted in the passage? Read the given passage and answer the following questions. The multiverse hypothesis posits that our universe is not the only one but rather one of many universes that exist. This idea has gained popularity in recent years due to advancements in cosmology and theoretical physics that lend support to the multiverse theory.

One of the primary pieces of evidence comes from the study of cosmic inflation. The theory of cosmic inflation suggests that the rapid expansion of the universe following the Big Bang could have created "pocket" universes, each with its own distinct physical laws and constants. Observations of the cosmic microwave background radiation, the afterglow of the Big Bang, reveal minute temperature fluctuations that some scientists argue are indicative of interactions with other universes.

Additionally, string theory, which attempts to reconcile general relativity and quantum mechanics, naturally leads to a multiverse scenario. String theory posits the existence of multiple dimensions beyond the familiar three spatial dimensions and time. These extra dimensions could give rise to numerous universes with different properties. While string theory remains unproven, its mathematical framework supports the multiverse concept. However, the multiverse hypothesis faces significant challenges. One of the most pressing issues is the lack of direct observational evidence. By definition, other universes are beyond the observable horizon of our own, making it incredibly difficult to gather empirical data. Critics argue that without direct evidence, the multiverse theory remains speculative and borders on metaphysics rather than science.

Philosophically, the multiverse hypothesis raises profound questions about the nature of reality and our place within it. If multiple universes exist, each potentially with its own version of "us," it challenges our understanding of individuality and existence. Moreover, it complicates the concept of fine-tuning, the idea that certain conditions in our universe are precisely set to allow for life. If countless other universes exist, some with the right conditions for life and others without, the fine-tuning argument might lose its significance.

In conclusion, recent cosmological and theoretical physics findings support the multiverse hypothesis, but _____ and philosophical debates persist. The quest to understand the multiverse continues to challenge and expand the boundaries of science and philosophy.

- (a) pacify
- (b) alienate
- (c) propitiate
- (d) endear
- (e) commend

Q25. Column I

- (A) COVID-19 vaccine was rolled out on Friday
- (B) The vaccine is a highly purified inactivated
- (C) Phase-I clinical trials of the vaccine, making Column I
- (D) Covaxin, the world's first COVID-19 candidate vaccine
- (E) here the variants of most concern are spreading.
- (F) played a role in the development of Covaxin

In the questions given below few phrases are given in each column which are grammatically correct. Connect them to make sentence in the best possible way without changing the intended meaning. Choose the best possible combination as your answer accordingly from the options to form a meaningful sentence.

- (a) (B)-(D) and (C)-(F)
- (b) (A)-(D) and (C)-(F)
- (c) (B)-(E) and (C)-(F)
- (d) (C)-(D)
- (e) None of the above

Ans.(d)

Q26. Column I

- (A) There were
- (B) Objective
- (C) The Centre
- Column II
- (D) to improve
- (E) of the poor
- (F) responsible for the students

In the questions given below few phrases are given in each column which are grammatically correct. Connect them to make sentence in the best possible way without changing the intended meaning. Choose the best possible combination as your answer accordingly from the options to form a meaningful sentence.

- (a) (B)-(D) and (C)-(F)
- (b) (C)-(F)
- (c) (B)-(E) and (C)-(F)
- (d) (C)-(D)
- (e) None of the above

Ans.(d)

Q27. Column I

- (A) They inked a special arrangement which allows
- (B) The discontinuation of the high-profile agitation has
- (C) The launch also marked the first dedicated Column II
- (D) mission of ISRO's commercial arm NewSpace India Ltd.
- (E) their charge of backdoor appointments
- (F) come as a propaganda victory for the government

In the questions given below few phrases are given in each column which are grammatically correct. Connect them to make sentence in the best possible way without changing the intended meaning. Choose the best possible combination as your answer accordingly from the options to form a meaningful sentence.

- (a) (A)-(E)
- (b) (A)-(F) and (C)-(D)
- (c) (C)-(B) and (B)-(F)

- (d) (B)-(F) and (C)-(D)
(e) None of these

Ans.(d)

Q28. Consumer goods maker (A)/ Dabur India Ltd has shrink its cycle (B)/ of strategic reviews from (C)/ four years to three years. (D)

Read the sentence to find out whether there is any grammatical or idiomatic error in it. The error, if any, will be in one part of the sentence. The corresponding letter of that part is the answer. If the given sentence is correct as it is, then choose option 'No Error' as the answer response. (Ignore errors of punctuation, if any).

- (a) A
(b) B
(c) C
(d) D
(e) No Error

Ans.(b)

Q29. The director (A)/ of the company has invited (B)/ several investors such as (C)/ from

Read the sentence to find out whether there is any grammatical or idiomatic error in it. The error, if any, will be in one part of the sentence. The corresponding letter of that part is the answer. If the given sentence is correct as it is, then choose option 'No Error' as the answer response. (Ignore errors of punctuation, if any).

- (a) A
(b) B
(c) C
(d) D
(e) No Error

Ans.(b)

Q30. Scientific research (A)/ on the environment has revealed (B)/ that the use of plastic (C)/ on the

Read the sentence to find out whether there is any grammatical or idiomatic error in it. The error, if any, will be in one part of the sentence. The corresponding letter of that part is the answer. If the given sentence is correct as it is, then choose option 'No error' as the answer response. (Ignore errors of punctuation, if any).

- (a) A
(b) B
(c) C
(d) D
(e) No error

Ans.(c)

Q31. 15 men can complete a work in 20 days. How many days will 10 men take to complete the same work?

- (a) 30
(b) 25
(c) 24
(d) 28
(e) 20

Ans.(a)

Q32. A mixture contains milk and water in the ratio 4:1. If 10 liters of mixture is removed and replaced with water, the ratio becomes 2:3. What was the initial quantity.

- (a) 30
- (b) 20
- (c) 24
- (d) 28
- (e) 25

Ans.(b)

Q33. A and B can complete a work in 10 days and 15 days respectively. they work together for 4 days. How much work is left?

- (a) $\frac{1}{3}$
- (b) $\frac{1}{2}$
- (c) $\frac{2}{3}$
- (d) $\frac{2}{5}$
- (e) $\frac{4}{3}$

Ans.(a)

Q34. The average of 10 numbers is 28. If the average of 8 of these numbers is 25, then the average of the removed number?

- (a) 30
- (b) 25
- (c) 24
- (d) 28
- (e) 20

Ans.(d)

Q35. Simple

- (a) 13000
- (b) 12000
- (c) 12400
- (d) 12800
- (e) 10000

Ans.(e)

Q36. 121, ?, 1

Find the missing number.

- (a) 139
- (b) 131
- (c) 129
- (d) 127
- (e) 133

Ans.(b)

Q37. 111, 113, 117, 125, 141, ?

Find the missing number in the following number series.

- (a) 173
- (b) 179
- (c) 182
- (d) 190

(e) 168

Ans.(a)

Q38. 3, 4, ?, 10, 18, 34

Find the missing number in the following number series.

(a) 12

(b) 7

(c) 6

(d) 8

(e) 5

Ans.(c)

Q39. 2, ?, 40, 120, 240, 240

Find the missing number.

(a) 12

(b) 8

(c) 6

(d) 10

(e) 4

Ans.(d)

Q40. Find the missing number in the following table. The table gives the number of TV and mobile sold by five different shops (A, B, C, D & E).

Shops	TV sold
A	240
B	360
C	90
D	120
E	72

(a) 130

(b) 125

(c) 124

(d) 128

(e) 120

Ans.(e)

Q41. Find the missing number in the following table. The table given below show the TV and mobile sold by five different shops (A, B, C, D & E).

Shops	TV sold	Mobile Sold
A	240	150
B	360	123
C	90	81
D	120	99
E	72	111

(a) 30:31

(b) 25:24

(c) 24:25

(d) 50:17

(e) 20:21

Ans.(d)

Q42. If the mobile sold by F is 20% more than that of A and average number of items (TV and Mobile) sold by F is 220. Find the TVs sold by F.

The table given below show the TV and mobile sold by five different shops (A, B, C, D & E).

Shops	TV sold	Mobile Sold
A	240	150
B	360	123
C	90	81
D	120	99
E	72	111

(a) 230

(b) 225

(c) 224

(d) 228

(e) 260

Ans.(e)

Q43. If the cost of each mobile is ₹ 11000 and the total cost of all the mobiles sold by five shops is ₹ 112000. Find the number of mobiles sold by F.

Shops	TV sold
A	240
B	360
C	90
D	120
E	72

(a) 112000

(b) 112900

(c) 112800

(d) 111280

(e) 121010

Ans.(c)

Q44. The mobile sold by F is 20% more than that of A.

The table given below shows the TV and mobile sold by five different shops (A, B, C, D & E).

Shops	TV sold	Mobile Sold
A	240	150
B	360	123
C	90	81
D	120	99
E	72	111

(a) 24.3%

(b) 43.25%

(c) 24.34%

(d) 46.25%

(e) 20%

Ans.(d)

Q45. Find the difference between mobiles and TV sold by all the shops.

The table given below show the TV and mobile sold by five different shops (A, B, C, D & E).

Shops	TV sold	Mobile Sold
A	240	150
B	360	123
C	90	81
D	120	99
E	72	111

- (a) 330
- (b) 318
- (c) 324
- (d) 328
- (e) 320

Ans.(b)

Q46. $3^2 - 5^2 + 4$

What will come in place of question mark (?) in the following question?

- (a) 80
- (b) 34
- (c) 17
- (d) 84
- (e) 57

Ans.(d)

Q47. ?% of 40 = 12

What will come in place of question mark (?) in the following question?

- (a) 30
- (b) 27
- (c) 32
- (d) 25
- (e) 35

Ans.(b)

Q48. $(225 - 20) \times 4$

What will come in place of question mark (?) in the following question?

- (a) 125
- (b) 120
- (c) 180
- (d) 160
- (e) 100

Ans.(a)

Q49. $11.11\% \times 99 + 617 = ?$ What value should come in place of question mark?

- (a) 628
- (b) 640
- (c) 620
- (d) 632
- (e) 615

Ans.(a)

Q50. 24% of $125 + 48\%$ $150 = ?$

What will come in place of the question mark (?) in the following questions?

- (a) 106
- (b) 108
- (c) 104
- (d) 112
- (e) 102

Ans.(e)

Q51. $(841 \div 29) + (34 \times 5) - (23 \times 5) = ?$

What will come in place of the question mark (?) in the following questions?

- (a) 88
- (b) 81
- (c) 84
- (d) 78
- (e) 72

Ans.(c)

Q52. 33% of

What will come in place of the question mark (?) in the following questions?

- (a) 56.4
- (b) 5.94
- (c) 59.4
- (d) 49.4
- (e) 69.4

Ans.(c)

Q53. $\sqrt{625} + ?^2 = 13^2$

What will come in place of the question mark (?) in the following questions?

- (a) 10
- (b) 16
- (c) 8
- (d) 12
- (e) 14

Ans.(d)

Q54. $? + (13 \times 5) \times \sqrt{196} = 55\%$ of 200

What will come in place of the question mark (?) in the following questions?

- (a) 800
- (b) -800
- (c) 700
- (d) -700
- (e) -760

Ans.(b)

Q55. 48% of 900 + 20% of ? = 133×4

What will come in place of the question mark (?) in the following questions?

- (a) 1000

- (b) 600
- (c) 300
- (d) 500
- (e) 400

Ans.(d)

Q56. $544 \div 8.5 \times 4 = 2^?$ What will come in place of the question mark (?) in the following questions?

- (a) 7
- (b) 3
- (c) 1
- (d) 8
- (e) 9

Ans.(d)

Q57. (440×2)

What will come in place of the question mark (?) in the following questions?

- (a) 3060
- (b) 2840
- (c) 3040
- (d) 3240
- (e) 3140

Ans.(c)

Q58. Find the

Read the following information carefully and answer the questions given below. The information about total

employees (males and females) in three companies X, Y, and Z

Total males in Y is 45, and the difference between the males in X and Y equals the difference between males in X

and Z. The females in X, Y, and Z are consecutive multiples of 5. The total employees in X and Z are 60 and 75,

respectively. (Note: X has the least number of males and Z has maximum number of females.)

- (a) 25
- (b) 20
- (c) 30
- (d) 40
- (e) 45

Ans.(a)

Q59. Find the

Read the following information carefully and answer the questions given below. The information about total employees (males and females) in three companies X, Y, and Z

Total males in Y is 45, and the difference between the males in X and Y equals the difference between males in X and Z. The females in X, Y, and Z are consecutive multiples of 5. The total employees in X and Z are 60 and 75, respectively. (Note: X has the least number of males and Z has maximum number of females.)

- (a) 60
- (b) 70
- (c) 55
- (d) 75
- (e) 65

Ans.(b)

Q60. Find the difference between the total females in X and total males in Z.

Read the following information carefully and answer the questions given below. The information about total employees (males and females) in three companies X, Y, and Z

Total males in Y is 45, and the difference between the males in X and Y equals the difference between males in X and Z. The females in X, Y, and Z are consecutive multiples of 5. The total employees in X and Z are 60 and 75, respectively. (Note: X has the least number of males and Z has maximum number of females.)

- (a) 30
- (b) 20
- (c) 10
- (d) 15
- (e) 25

Ans.(e)

Q61. Total m

Read the foll

employees (n

Total males in

and Z. The fe

respectively.

- (a) 41.28%
- (b) 42.33%
- (c) 66.67%
- (d) 32.5%
- (e) 46.67%

Ans.(e)

Q62. Diamete

area of the sp

(a) 61600 m²

(b) 8800 m²

(c) 431200 m²

(d) 15400 m²

(e) 10000 m²

Ans.(d)

Q63. Isha bo

is the overall

(a) 66 2/3%

(b) 22 1/7%

(c) 22%

(d) 33 1/3%

(e) 44%

Ans.(d)

Q64. Two partners A and B enter into a partnership with their initial sum Rs 50,000 and Rs 40,000 respectively.

After 8 months, B left the partnership. If total profit after a year is Rs 6900, find profit share of A.

- (a) Rs. 5,000
- (b) Rs 6,500
- (c) Rs 4,500
- (d) Rs 3,500

(e) Rs 5,500

Ans.(c)

Q65. A man sees a train passing over a bridge of length 1 km. The length of the train is half of the length of bridge. If the train passes the bridge in 2 minutes then find the speed of the train ?

- (a) 30 kmph
- (b) 45 kmph
- (c) 50 kmph
- (d) 60 kmph
- (e) 54 kmph

Ans.(b)

Q66. Which of the following element is exactly between 'K' and 'H' in the given arrangement?

Study the following arrangement and answer the given questions:
W 5 % H E & U 6 I * Q 3 Z # 2 K ^ F 7 R \$ 0 2 U + 4

- (a) I
- (b) *
- (c) 6
- (d) Q
- (e) None of the above

Ans.(b)

Q67. Which of the following is the eighth of the fifth element from the right in the given series.
Study the following arrangement and answer the given questions:
W 5 % H E & U 6 I * Q 3 Z # 2 K ^ F 7 R \$ 0 2 U + 4

- (a) 0
- (b) 2
- (c) 4
- (d) 6
- (e) None of the above

Ans.(b)

Q68. Find the element which is one out from the given options.

- Study the following arrangement and answer the given questions:
W 5 % H E & U 6 I * Q 3 Z # 2 K ^ F 7 R \$ 0 2 U + 4
- (a) WH5
 - (b) &IU
 - (c) Q#3
 - (d) 4U+
 - (e) K7^

Ans.(d)

Q69. What is the position of F with respect to 6?

Study the following series carefully and answer the given questions:

W 5 % H E & U 6 I * Q 3 Z # 2 K ^ F 7 R \$ 0 2 U + 4

- (a) Tenth to the left
- (b) Ninth to the right
- (c) Eleventh to the right
- (d) Tenth to the right
- (e) None of these

Ans.(d)

Q70. How many numbers are immediately preceded and followed by vowel?

Study the following series carefully and answer the given questions:

W 5 % H E & U 6 I * Q 3 Z # 2 K ^ F 7 R \$ 0 2 U + 4

- (a) One
- (b) Two
- (c) Three
- (d) Four
- (e) None of these

Ans.(a)

Q71. Find the shortest distance between his initial point and final point

Study the following information carefully and answer the given questions:

Ayush walks 12m towards north direction and stops at point A. From point A, he takes two consecutive right turns and covers 9m and 6m respectively and stops at point B. From point B, he takes two consecutive left turns and covers 7m and 6m respectively and reaches at point C. From point C, he takes right turn and covers 5m, then he reaches his final destination.

- (a) 12m
- (b) 15m
- (c) 9m
- (d) 6m
- (e) 13m

Ans.(b)

Q72. What is the shortest distance between point A and point C?

Study the following information carefully and answer the given questions:

Ayush walks 12m towards north direction and stops at point A. From point A, he takes two consecutive right turns and covers 9m and 6m respectively and stops at point B. From point B, he takes two consecutive left turns and covers 7m and 6m respectively and reaches at point C. From point C, he takes right turn and covers 5m, then he reaches his final destination.

- (a) $\sqrt{57}$ m
- (b) $\sqrt{58}$ m
- (c) $2\sqrt{29}$ m
- (d) $\sqrt{39}$ m
- (e) 10 m

Ans.(b)

Q73. What is the direction of point B with respect to his final position?

Study the following information carefully and answer the given questions:

Ayush walks 7m towards south direction and takes three consecutive right turns of 15m, 4m and 12m respectively and stops at point A. After that he turns north direction and covers 9m distance and stops at point B. From point B, he takes two consecutive left turns and covers 7m and 6m respectively and reaches at point C. From point C, he takes right turn and covers 5m, then he reaches his final destination.

- (a) North
- (b) North-west
- (c) North-east
- (d) South-west
- (e) South-east

Ans.(c)

Q74. What is the position of box U with respect to box Q? Study the following information carefully and answer the questions given below:

Nine boxes are kept one above the other in the form of the stack. Box M is kept three boxes above box T. At least one box is kept above box M. Box O is kept two boxes below box T. As many boxes are kept above box O as below box R. Four boxes are kept between box S and box R. Box N is kept exactly between box M and box Q. Box P is kept above box M. Box U is not kept adjacent to box O.

- (a) Four boxes below
- (b) Three boxes above
- (c) Three boxes below
- (d) Four boxes above
- (e) Immediately above

Ans.(c)

Q75. Which of the following is true?

- I. More than five boxes are kept below box T.
- II. Box P is kept immediately below box Q.
- III. Box T and box S are adjacent.

Study the following information carefully and answer the questions given below:

Nine boxes are kept one above the other in the form of the stack. Box M is kept three boxes above box T. At least one box is kept above box M. Box O is kept two boxes below box T. As many boxes are kept above box O as below box R. Four boxes are kept between box S and box R. Box N is kept exactly between box M and box Q. Box P is kept above box M. Box U is not kept adjacent to box O.

- (a) Only I
- (b) Both I and II
- (c) Only III
- (d) Both II and III
- (e) All I, II and III

Ans.(d)

Q76. If all the boxes are kept in alphabetical order from top to bottom, then the position of box T is how many boxes away from the bottom?

Study the following information carefully and answer the questions given below:

Nine boxes are kept one above the other in the form of the stack. Box M is kept three boxes above box T. At least one box is kept above box M. Box O is kept two boxes below box T. As many boxes are kept above box O as below box R. Four boxes are kept between box S and box R. Box N is kept exactly between box M and box Q. Box P is kept above box M. Box U is not kept adjacent to box O.

- (a) One
- (b) Two
- (c) None
- (d) Three
- (e) More than three

Ans.(a)

Q77. As many boxes are kept above box P as below box ____?

Study the following information carefully and answer the questions given below:

Nine boxes are kept one above the other in the form of the stack. Box M is kept three boxes above box T. At least one box is kept above box M. Box O is kept two boxes below box T. As many boxes are kept above box O as below box R. Four boxes are kept between box S and box R. Box N is kept exactly between box M and box Q. Box P is kept above box M. Box U is not kept adjacent to box O.

- (a) Box M
- (b) Box O
- (c) Box R
- (d) Box S
- (e) Box U

Ans.(e)

Q78. If box R is related to box T in the similar way box N is related to box Q, then which among the following box is related to box U?

Study the following information carefully and answer the questions given below:

Nine boxes are kept one above the other in the form of the stack. Box M is kept three boxes above box T. At least one box is kept above box M. Box O is kept two boxes below box T. As many boxes are kept above box O as below box R. Four boxes are kept between box S and box P. Box N is kept exactly between box M and box O. Box P is kept above box M.

- (a) Box P
- (b) Box S
- (c) Box O
- (d) Box T
- (e) None of the above

Ans.(c)

Q79. Statements:

Only a few mice are mobile.

Only a few humans are mobile.

All wire is mobile.

Conclusions:

I. Some mouse are human.

II. Some mobile are wire.

In the question, you are given two statements followed by two conclusions. You have to take the given statements to be true, even if they seem to be at variance with commonly known facts. Read the conclusions and then decide which of the given conclusion logically follows from the given statements disregarding commonly known facts.

- (a) Only I follows
- (b) Only II follows
- (c) Either I or II follows
- (d) Neither I nor II follows
- (e) Both I and II follow

Ans.(a)

Q80. Statements:

No computer is a machine.

All machine are tools.

Some tools are good.

Conclusions:

I. Some good are not computers.

II. Some machine are good.

The following question contains some statements followed by two conclusions numbered I and II. Assume that all the statements are true, even if they seem to differ from commonly known facts. Analyze both conclusions and decide which one logically follows from the given statements.

- (a) If only conclusion I follows

Study the following information carefully and answer the given question below:

Eight people A, B, C, D, E, F, G and H are sitting around a circular shaped table but not necessarily in the same order. Some of them face inside and some face outside.

E sits third to the left of D and both of them face the same direction. G sits second to the right of H who sit third to the left of E. B sits third to the left of C. E and F sit opposite to each other. Two persons sit between C and D. Only two persons are facing outside and both of them doesn't sit adjacent to D and C.

- (a) E sit second to the right of D
- (b) D sit opposite to F
- (c) A faces outside the center.
- (d) B and H sit opposite to each other
- (e) None of these

Ans.(d)

Q85. Who among the following sit third to the right of D?

Study the following information carefully and answer the given question below:

Eight people A, B, C, D, E, F, G and H are sitting around a circular shaped table but not necessarily in the same order. Some of them face inside and some face outside.

E sits third to the left of D and both of them face the same direction. G sits second to the right of H who sit third to the left of E. B sits third to the left of C. E and F sit opposite to each other. Two persons sit between C and D. Only two persons are facing outside and both of them doesn't sit adjacent to D and C.

Only two persons are facing outside and both of them doesn't sit adjacent to D and C.

- (a) G
- (b) H
- (c) C
- (d) E
- (e) F

Ans.(c)

Q86. If D and E are facing the same direction, then who among the following sit opposite to D?

Study the following information carefully and answer the given question below:

Eight people A, B, C, D, E, F, G and H are sitting around a circular shaped table but not necessarily in the same order. Some of them face inside and some face outside.

E sits third to the left of D and both of them face the same direction. G sits second to the right of H who sit third to the left of E. B sits third to the left of C. E and F sit opposite to each other. Two persons sit between C and D. Only two persons are facing outside and both of them doesn't sit adjacent to D and C.

Only two persons are facing outside and both of them doesn't sit adjacent to D and C.

- (a) B
- (b) A
- (c) E
- (d) G
- (e) None of these

Ans.(a)

Q87. Who is the position of person who sits opposite to G with respect to F?

Study the following information carefully and answer the given question below:

Eight people A, B, C, D, E, F, G and H are sitting around a circular shaped table but not necessarily in the same order. Some of them face inside and some face outside.

E sits third to the left of D and both of them face the same direction. G sits second to the right of H who sit third to the left of E. B sits third to the left of C. E and F sit opposite to each other. Two persons sit between C and D. Only two persons are facing outside and both of them doesn't sit adjacent to D and C.

Only two persons are facing outside and both of them doesn't sit adjacent to D and C.

- (a) Third to the left
- (b) Third to the right
- (c) Fourth to the right

- (d) Immediate left
(e) Immediate right

Ans.(d)

Q88. How many friends have more toffees than R?

Study the following information carefully and answer the questions given below:

Six friends – P, Q, R, S, T, and U – have different number of toffees. P has more toffees than Q, but fewer than T. U has the second highest number of toffees. R has more toffees than Q but less than P. The one who has the least toffees is not Q.

- (a) More than three
(b) Three
(c) Two
(d) One
(e) None

Ans.(b)

Q89. If the number of toffees of P and U have?

Study the following information carefully and answer the questions given below:

Six friends – P, Q, R, S, T, and U – have different number of toffees. P has more toffees than Q, but fewer than T. U has the second highest number of toffees. R has more toffees than Q but less than P. The one who has the least toffees is not Q.

- (a) 50
(b) 61
(c) 52
(d) 53
(e) 54

Ans.(b)

Q90. Who has the second least number of toffees?

Study the following information carefully and answer the questions given below:

Six friends – P, Q, R, S, T, and U – have different number of toffees. P has more toffees than Q, but fewer than T. U has the second highest number of toffees. R has more toffees than Q but less than P. The one who has the least toffees is not Q.

- (a) P
(b) T
(c) R
(d) S
(e) None of these

Ans.(d)

Q91. If it is possible to make a four-letter meaningful word with the 1st, 4th, 5th and 9th letters of the word 'FRIENDSHIP', then which would be the third letter of the word from right? If more than one such meaningful word can be formed give 'Y' as the answer. If no such meaningful word can be formed, give 'Z' as your answer.

- (a) I
(b) F
(c) D
(d) Y
(e) Z

Ans.(a)

Q92. Statements: $V \leq W = X < Y > Z$, $B \leq V$

Conclusion: I. $X \geq B$

II. $B \leq Z$

In this question, relationship between different elements is shown in the statements. The statements are followed by conclusions.

Give answer:

- (a) If only conclusion I is true
- (b) If only conclusion II is true
- (c) If either conclusion I or II is true
- (d) If neither conclusion I nor II is true
- (e) If both conclusions I and II are true

Ans.(a)

Q93. Statement

Conclusions:

I. $C < K$

II. $D \leq S$

In this question, relationship between different elements is shown in the statements. The statements are followed by two conclusions.

Give answer:

- (a) If only conclusion I is true
- (b) If only conclusion II is true
- (c) If either conclusion I or II is true
- (d) If neither conclusion I nor II is true
- (e) If both conclusions I and II are true

Ans.(b)

Q94. Statement

Conclusions:

I. $Y < M$

II. $O < Z$

In this question, the relationship between different elements is shown in the statements. The statements are followed by two conclusions.

Give answer:

- (a) If only conclusion I is true
- (b) If only conclusion II is true
- (c) If either conclusion I or II is true
- (d) If both conclusions I and II are true
- (e) If neither conclusion I nor II is true

Ans.(b)

Q95. Find the odd-one out.

- (a) XVE
- (b) DFU
- (c) DBY
- (d) OMN
- (e) USH

Ans.(b)

Q96. Who among the following is designated as Category Manager (CM)?

Read the following information carefully and answer the questions given below:

Eight persons – P, Q, R, S, T, U, V and W are designated at the eight different designations – Chief Executive Officer (CEO), Vice President (VP), Product Manager (PM), Category Manager (CM), Senior Associate (SA), Associate, Trainee and Intern, but not necessarily in the same order. The order of the designations is in decreasing order of seniority such that CEO is the seniormost designation and Intern is the junior-most.

V is designated junior to Q. More than three persons are designated between Q and T. T is designated senior to Q. V is not designated as trainee. Three persons are designated between Q and W. As many persons are designated senior to W as junior to U. One person is designated between U and P. R is designated junior to P. S is not designated as VP

- (a) The one who is designated immediately senior to T
- (b) P
- (c) The one who is designated three persons senior to U
- (d) R
- (e) Q

Ans.(b)

Q97. How many persons are designated between U and P?

Read the following information carefully and answer the questions given below:
Eight persons – P, Q, R, S, T, U, V and W are designated at the eight different designations – Chief Executive Officer (CEO), Vice President (VP), Product Manager (PM), Category Manager (CM), Senior Associate (SA), Associate, Trainee and Intern, but not necessarily in the same order. The order of the designations is in decreasing order of seniority such that CEO is the seniormost designation and Intern is the junior-most.
V is designated junior to Q. More than three persons are designated between Q and T. T is designated senior to Q. V is not designated as trainee. Three persons are designated between Q and W. As many persons are designated senior to W as junior to U. One person is designated between U and P. R is designated junior to P. S is not designated as VP

- (a) Three
- (b) Five
- (c) Four
- (d) Six
- (e) Two

Ans.(a)

Q98. Which of the following is designated as Category Manager (CM)?
Read the following information carefully and answer the questions given below:
Eight persons – P, Q, R, S, T, U, V and W are designated at the eight different designations – Chief Executive Officer (CEO), Vice President (VP), Product Manager (PM), Category Manager (CM), Senior Associate (SA), Associate, Trainee and Intern, but not necessarily in the same order. The order of the designations is in decreasing order of seniority such that CEO is the seniormost designation and Intern is the junior-most.

V is designated junior to Q. More than three persons are designated between Q and T. T is designated senior to Q. V is not designated as trainee. Three persons are designated between Q and W. As many persons are designated senior to W as junior to U. One person is designated between U and P. R is designated junior to P. S is not designated as VP

- (a) Vice President
- (b) Product Manager
- (c) Category Manager
- (d) Senior Associate
- (e) Associate

Ans.(d)
