In option (a), 'has' is incorrect because subject (establishments and factories) is plural here therefore option (d) is also incorrect. Hence correct choice is option (b).

S20. Ans.(a)

Sol. The highlighted phrase in the statement is incorrect as sentence is in Past indefinite. In option (b), 'have' is incorrect as subject (DCW) is singular. Option (c) is in Perfect continuous hence incorrect. In Option (d), 'issue' is incorrect as 'has+v3' is correct.

S21. Ans.(d)

Sol. In the highlighted phrase 'spend' is incorrect because sentence is in past tense and third form of spend is 'spent' therefore option (b) is also incorrect. In option (a), 'year' should be 'years'. In option (b), 'then' should be 'than' hence option (c) is also incorrect.

S22. Ans.(e)

S23. Ans.(c)

Sol. The correct replacement of the highlighted phrase is "has the skills" as the sentence follows the structure of present tense. Moreover, the subject of the sentence is singular. Hence, option (c) is the correct choice.

S24. Ans.(a)

Sol. The correct choice for the answer is option (a): *Both II and III*.

Statement II is true because it is stated in the last paragraph of the passage that "humans, like other animals, also evolved the option to freeze, or "play dead" in the face of a threat."

Statement III is true because in the first paragraph it says: *Most noises we hear are delivered from our ear to an area of the brain devoted to analyzing a sound and breaking it into its component parts, such as gender, age, and tone; high or low; a brass, stringed or electric instrument – or several combined; a rabbit or a coo, and what animal makes that sound.*

Statement I is incorrect because in the last paragraph it says "Humans and other animals scream for many reasons – in joy, in surprise, in fear. " This tells us that there can be many reasons for humans screaming besides fear.

Hence, option (a) is the correct choice for the answer.

S25. Ans.(b)

Sol. The correct choice for the answer is option (b): *The scream one lets out when faced with danger holds an element of roughness which is crucial for letting others know of the possible danger.*

This answer is found in the second paragraph where it says: This is especially true for screams when we're scared. These have a unique sound signature encompassed by the term "roughness." This roughness is what serves to alert others to danger.

The rest of the options are not mentioned anywhere in the passage given. Therefore they cannot be considered for the answer.

Hence, option (b) is the correct choice for the answer.

S26. Ans.(e)

Sol. The correct choice for the answer is option (e): Both II and III

Statement II is false as the passage says: Since screaming takes quite a few muscles (probably *a little less than* the 100 used for speaking), a person frozen in fear is rendered mute as well as immobile.

Statement III is also false because it can be found in the article that: Research suggests when we scream in fear, the noise serves the *dual purpose of sharpening our own focus in the face of a threat as well as of warning others.*

The facts present in the passage help us figure out why the statements II and III are false.

Hence, option (e) is the correct choice for the answer.

S27. Ans.(c)

Sol. The correct choice for the answer is option (c): *A certain part of the brain responsible for overlooking muscle activity takes over other responses of the brain and forces every movement of the body to shut down, including speech.*

The answer is found towards the end of the last paragraph: *This happens involuntarily, when the cerebellum, the part of the brain that regulates muscle activity, overpowers other terrified brain responses and basically shuts down all movement. Since screaming takes quite a few muscles (probably a little less than the 100 used for speaking), a person frozen in fear is rendered mute as well as immobile.*

All the other options are nowhere to be found in the above passage.

Hence, option (c) is the correct choice for the answer.

S28. Ans.(a)

Sol. The correct choice for the answer is option (a): *The brain processes the scream in a part which helps activate our fight or flight mode which then helps us become aware and scan the situation.*

This answer is present in the second paragraph: *A scream goes straight from the ear to the amygdala, the part of the brain that processes fear and kickstarts the body's fight-or-flight response. The sound jolts our brains into increased alertness and analysis.*

Hence, option (a) is the correct choice for the answer.

S29. Ans.(b)

Sol. The correct choice for the answer is option (b): *signals*.

To signal means to convey information or instructions by means of a gesture, action, or sound.

Indicate means to express an intention, opinion, or wish in an indirect way.

To bargain means an agreement between two or more people or groups as to what each will do for the other.

To divide means to separate or be separated into parts.

Flows mean the action or fact of moving along in a steady, continuous stream.

S30. Ans.(d)

Focus on or concentrate on have similar meanings which can be explained as to give most of your attention to someone or something.

The rest of the phrases are not applicable because they all have different meanings. Hence, they cannot be used to replace the given phrase.

A	30	20	40	90
B	40	25	15	80
C	50	25	40	115
Total	120	70	95	285

S41. Ans.(b)

Sol. Total students in group Y of all the classes = 70

S42. Ans.(a)

S43. Ans.(a)

Sol. Total girls in group Y and Z together = $34 - 12 = 22$

Total boys in group Y and Z together on class A = $(90 - 30) - 22 = 38$

S44. Ans.(b)

Sol. Required difference = $120 - 95 = 25$

S45. Ans.(b)

Sol. Average students in group X of class and B = $\frac{40+30}{2} = 35$

S46. Ans.(a)

Sol. Let length of train A = $3x$

Length of train B = $5x$

Speed of train A = $72 \times \frac{5}{18} = 20$ m/sec

Speed of train B = $54 \times \frac{5}{18} = 15$ m/sec

ATQ,

$$\frac{8x}{20+15} = 16$$

$$\Rightarrow x = 70$$

$\therefore$ Length of train B = $5 \times 70 = 350$ m

S47. Ans.(b)

Sol. Perimeter of the circle = $2 \times \frac{22}{7} \times 28 = 176$ cm

ATQ -

$$(150x - 100) - 100x = 100$$

$$50x = 200$$

$$x = 4 \text{ Rs.}$$

So, selling price of pen = $(150 \times 4 - 100) = 500$ Rs.
