Q81. Which of the following best completes the analogy: Joy is to presence as sorrow is to —?

Read the following passage and answer the questions based on the passage:

To divide life into fixed opposites of happiness and grief is to misunderstand its deepest pattern. Human life does not move in a straight line of delight or misery; instead, it flows through a living exchange where one feeling gives depth and definition to the other. Victory feels most intense when it follows defeat, and the sting of losing something gains shape only because we once held it close. Thus, joy and sorrow are not enemies but partners in the same story. Across ages, thinkers have recognized this emotional duality. The Stoics viewed suffering as unavoidable and even useful in reaching calm, while Eastern paths such as Buddhism emphasize that all experiences pass and nothing remains permanent. In both views, the search for lasting happiness requires accepting change. Without grief, joy would lose its sharpness and become plain—without contrast, it would carry little weight. This mutual dependence appears even in everyday life: spring seems brighter after a bitter winter, and quiet solitude matters only to someone who has felt the noise of crowds. Often, personal maturity is shaped in painful trials—loss and hardship carve depth into us, strengthening our resolve. To see life as a single colour—either joy or sorrow—is to miss the rich interplay of light and shadow that makes a life in a single colour—either joy or sorrow—so striking.

- (a) Liberty
- (b) Expectation
- (c) Missingness
- (d) Stillness

Ans.(c)

Q82. Based on the passage, which of the following best reflects the writer's view?

Read the following passage and answer the questions based on the passage:

Wanting uninterrupted happiness is like demanding a life in a single colour—smooth but lifeless. In this sense, joy and sorrow together create a chiaroscuro of the mind, a striking interplay of light and shadow that makes life more vivid and human.

- (a) To summarise major philosophical schools in history
- (b) To contend that sorrow is necessary for genuine joy and should be accepted
- (c) To mourn how easily happiness disappears
- (d) To criticise

The Stoics viewed suffering as unavoidable and even useful in reaching calm, while Eastern paths such as Buddhism emphasize that all experiences pass and nothing remains permanent. In both views, the search for lasting happiness requires accepting change. Without grief, joy would lose its sharpness and become plain—without contrast, it would carry little weight. This mutual dependence appears even in everyday life: spring seems brighter after a bitter winter, and quiet solitude matters only to someone who has felt the noise of crowds. Often, personal maturity is shaped in painful trials—loss and hardship carve depth into us,

strengthening empathy, resilience, and thankfulness. Wanting uninterrupted happiness is like demanding a life in a single colour—smooth but lifeless. In this sense, joy and sorrow together create a chiaroscuro of the mind, a striking interplay of light and shadow that makes life more vivid and human.
