The real difficulty lies in balancing liberty with accountability in diverse societies. Because democracies contain varied cultural, political, and economic groups, they naturally become spaces of disagreement. In such settings, responsibility requires more than obedience to law; it calls for empathy, reasoned judgment, and dedication to the common good.

A citizen's freedom to protest, for instance, must be exercised with respect for public order and the rights of others. Likewise, the right to vote must be matched by a duty to choose wisely, not driven by prejudice, populist manipulation, or misinformation. This strain between liberty and responsibility becomes most visible during crises—whether a pandemic, communal violence, or constitutional conflict. In such moments, prioritizing individual freedom over collective safety can be disastrous. Refusing basic precautions in a health emergency or circulating unverified claims during unrest shows how unchecked freedom can weaken democratic strength.

Moreover, democracy does not sustain itself automatically; it depends on alert citizens who understand that rights endure only through participation and ethical use. When responsibility disappears, democratic institutions become vulnerable from within. Demagogues often gain ground not only because governments fail, but because citizens become indifferent or misuse democratic freedoms. Thus, freedom and responsibility are not rivals in a working democracy; they reinforce each other. Protecting liberty requires citizens capable of ethical thinking, informed debate, and constructive dissent. Without responsibility, freedom can shift from a force for justice into a source of fragmentation.

Q95. What does the passage suggest about the relationship between freedom and responsibility in a democracy? Read the following passage and answer the question based on it. Democracy is a system of governance based on the principles of liberty, equality, and justice. It is a system where the rights and freedoms of individuals are protected and guaranteed. The passage discusses the relationship between freedom and responsibility in a democracy. It states that freedom is not an absolute right and is often limited by the need for order, division, or the rights of others. It also mentions that responsibility is a key component of a democracy, and that citizens must exercise their freedoms responsibly. The passage concludes that freedom and responsibility are not rivals in a working democracy; they reinforce each other. Protecting liberty requires citizens capable of ethical thinking, informed debate, and constructive dissent. Without responsibility, freedom can shift from a force for justice into a source of fragmentation. Democracy survives not merely through laws, but through the civic character of its people.
