Q83. What should come in the place of blank number [1]?

In the following passage, some words have been deleted. Read the passage intently and choose the most appropriate option to fill in each blank:

To apprehend race as a biological constant or a self-evident natural category is to mistake a historically produced artefact for an ontological given—to misread a [1] _____, a discursive and regulatory topology sustained not by phenotypic reality but by its compulsive reinscription across legal, medical, and carceral apparatuses. Within such a regime, the racialised body is not simply perceived but constituted—interpellated through surveillance technologies that render certain corporeal configurations legible as threatening, deviant, or socially expendable. The state, operating through its juridico-administrative machinery and the epistemic authority of demographic science, exercises a biopolitical management of population—wherein civic belonging is not an entitlement but a [2] _____, dispensed according to hierarchies of productivity, cultural assimilation, and racial fungibility. This apparatus transforms race into

a function of administrative necessity rather than lived identity. Contestation, when routed through liberal multicultural grammars of recognition, risks reinforcing the very taxonomic logic it purports to challenge. The radical imperative, therefore, is not the diversification of representation but a structural [3] _____ of the classificatory architecture through which racial subjects are produced. This demands the exposure of how liberal inclusion forecloses genuine alterity. Such a praxis necessitates the [4] _____ of identity as a fixed organising principle—dismantling its coherence so that a post-racial ethics of relationality and becoming may emerge: one that prizes indeterminacy over fixity, opacity over legibility, and contingency over essence. In this framework, emancipation is not recuperative but [5] _____—a break from the compulsion of racial intelligibility, a refusal of the logocentric demand to be categorised and known.

- (a) juridical simulacrum
- (b) praxis-field
- (c) epistemic surplus
- (d) normative

Q85. What should come in the place of blank number [3]?

In the following passage, some words have been deleted. Read the passage intently and choose the most appropriate option to fill in each blank:

To apprehend race as a biological constant or a self-evident natural category is to mistake a historically produced artefact for an ontological given—to misread a [1] _____, a discursive and regulatory topology sustained not by phenotypic reality but by its compulsive reinscription across legal, medical, and carceral apparatuses. Within such a regime, the racialised body is not simply perceived but constituted—interpellated through surveillance technologies

that render certain corporeal configurations legible as threatening, deviant, or socially expendable. The state, operating through its juridico-administrative machinery and the epistemic authority of demographic science, exercises a biopolitical management of population—wherein civic belonging is not an entitlement but a [2] _____, dispensed according to hierarchies of productivity, cultural assimilation, and racial fungibility. This apparatus transforms race into a function of administrative necessity rather than lived identity. Contestation, when routed through liberal multicultural grammars of recognition, risks reinforcing the very taxonomic logic it purports to challenge. The radical imperative, therefore, is not the diversification of representation but a structural [3] _____ of the classificatory architecture through which racial subjects are produced. This demands the exposure of how liberal inclusion forecloses genuine alterity. Such a praxis necessitates the [4] _____ of identity as a fixed organising principle—dismantling its coherence so that a post-racial ethics of relationality and becoming may emerge: one that prizes indeterminacy over fixity, opacity over legibility, and contingency over essence. In this framework, emancipation is not recuperative but [5] _____—a break from the compulsion of racial intelligibility, a refusal of the logocentric demand to be categorised and known.

- (a) consolidation
- (b) perpetuation
- (c) destitution
- (d) legitimatisation

Ans.(c)

Q86. What should be the correct answer for the blank [4]?
 In the following passage, a sentence has been deleted. Read the passage and choose the most appropriate option to fill in the blank. To apprehend the self-erasing nature of race as a socially produced artefact for a [1] _____, discursive [2] _____, and [3] _____, one must look beyond the phenotypic reification of race. Within such a regime, the racialised subject is not merely perceived but constituted—in a way that renders certain corporeal configurations legible as threatening, deviant, or socially expendable. The state, operating through its juridico-administrative machinery and the epistemic authority of demographic science, exercises a biopolitical management of population—wherein civic belonging is not an entitlement but a [2] _____, dispensed according to hierarchies of productivity, cultural assimilation, and racial fungibility. This apparatus transforms race into a function of administrative necessity rather than lived identity. Contestation, when routed through liberal multicultural grammars of recognition, risks reinforcing the very taxonomic logic it purports to challenge. The radical imperative, therefore, is not the diversification of representation but a structural [3] _____ of the classificatory architecture through which racial subjects are produced. This demands the exposure of how liberal inclusion forecloses genuine alterity. Such a praxis necessitates the [4] _____ of identity as a fixed organising principle—dismantling its coherence so that a post-racial ethics of relationality and becoming may emerge: one that prizes indeterminacy over fixity, opacity over legibility, and contingency over essence. In this framework, emancipation is not recuperative but [5] _____—a break from the compulsion of racial intelligibility, a refusal of the logocentric demand to be categorised and known.

- (a) reification
- (b) ablation
- (c) sedimentation
- (d) valorisation

Ans.(b)

To apprehend race as a biological constant or a self-evident natural category is to mistake a historically produced artefact for an ontological given—to misread a [1] _____, a discursive and regulatory topology sustained not by phenotypic reality but by its compulsive reinscription across legal, medical, and carceral apparatuses. This apparatus transforms race into a function of administrative necessity rather than lived identity. Contestation, when routed through liberal multiculturalist discourses, is neutralised and contained. The radical imperative, the demand for a reimagined classificatory architecture that would open space for genuine alterity, is foreclosed by the very logic of the system it seeks to dismantle, dismantling its coherence so as to maintain its hegemony and its determinacy over fixity, opacity, and the very possibility of the alternative but [5] _____—a broader social reality, a world not yet categorised and known.
