Comprehension:

Assamese or 'Asomiya' is the most commonly spoken language in the state of Assam. Besides, it also serves the purpose of a link language in the whole region. As a language, it is considered to have evolved out of Magadhi, a form of old Prakrit language. However, on account of various influences over the years the language has come to acquire some variations in its form of speech. These are called the groups of dialects of Assamese. Of these, the eastern group of dialects is spoken mainly in the Sibsagar district and its adjoining areas. Similarly, the central group of dialects is mostly spoken in the Nagaon district and the areas adjacent to it. In the west, on the other hand, there are two distinct groups of dialects. These are called the Goalparia and the Kamrupi groups.

Bodo or 'Bo-Ro' is another important spoken language of the state. It belongs to the Tibeto-Burman language family and is mostly spoken in the areas coming under the Bodoland Territorial Council, where it is the official language. By the 92nd Amendment of the Constitution of India 2003, Bodo has also become one of the 22 scheduled languages of the country.

Comprehension:

The process of urbanization should not unilaterally be associated with forces of modernization or secularization, even though in some limited sense, as stated by Milton Singer and R. Redfield, in the metropolitan urban centers as growth occurs from the stage of primary (orthogenetic) to secondary (heterogenetic) urbanization, *traditional literati* may be transformed into professional intelligentsia, whose function in the changed circumstances may be to mediate between tradition and modernity. Urbanization even in the 'secondary' phases may strengthen the sinews of the Great tradition because the communication channels which otherwise could be used for transmission of modern values, such as modern means of transport, press, radio, sound amplifiers, etc. are used to further the diffusion of the value system of the Great tradition. Every step in the intensification of communication thus means not only a benefit to modernity but equally, or probably more than equally, a benefit to the cause of the reinforcement of the Great tradition. Cultural renaissance and reformation as processes of change have relevance for Great tradition. Their significance has been both textual and contextual. Sanskritization as a process of cultural change has primarily a contextual significance; it is particularistic in origin and therefore belongs to the little tradition, Sanskritization, above all, describes an empirical process in cultural change, and has been most widespread.

There are broadly two different approaches to rural planning in the Third World: the improvement approach, which aims to encourage agricultural development within existing peasant production system, and the transformation approach, which attempts to establish new forms of agricultural and social organization, and which makes a radical break with existing system in terms of scale of operation, production techniques, and socio-legal structure. The improvement approach was especially characteristic of the development policies pursued by British colonial government in Africa, India and elsewhere. Under colonial rule extension works as often coupled with the enforcement of various administrative ordinances to prevent soil erosion or to encourage the cultivation of certain crops. Hence, general incentives to production were combined with principle of "persistent persuasion". The cases of non-observance were reported to authorities for court action. Various governments encouraged the marketing of these crops through state agencies or cooperative societies composed of basically small farmers for selling their produce. Thus, the colonial governments were willing to assist in developing an infrastructure concerned with distribution as well as production.
